

FREQUENTLY ASKED QUESTIONS:

Q: WHAT IS VEDIC ASTROLOGY? How is it related to other divination tools and spirituality?

A: It is the astrology of ancient India, also called Jyotish, science of knowledge. In India, where the nights are warm, the sky is clear, the stars and planets were bright due to absence of city lights at that time, for thousands years people observed the night sky and made correlations between movements of the planets and the events of human life here on earth. Planets of our solar system represent karmic points that will be experienced by every human throughout his/her lifetime. Experience will be subjective, depending on disposition of planets in the birth chart as well as individual's consciousness' past life. Birth chart is a blue print of our destiny and every promise in it will fructify during one's current life. It includes the worldly events like achievements, career, relationships, money, luck, spirituality as well as level and evolution of consciousness .

The future is mutable, however, and the choices every individual makes will still be in the frame of one's personality and destiny as reflected in the birth chart.

From the great teachers of all time Jesus and Buddha to modern visionaries like David Hawkins (M.D., PhD), Wayne Dyer (M.D.?), and Eckhart Tolle all teach us how to transcend our destiny. They teach us how to transcend ourselves in order to free ourselves from karma and sins of past and present lives. They show to us the way to ultimate liberation of the soul. However, attraction to the spiritual path and ones level of evolution will still be reflected in birth chart. A Zen master said:

“Many ways lead from the foot of the mountain,

But on the very top

We all gaze at the single bright moon”

The roads are different, but they all lead to the same result. For that reason sometimes I blend Vedic astrology with other divination tools like taro cards. Divination arts are used to help us comprehend our unique nature, purpose of life and destiny in the non-linear domain of ever present, omnipotent, un-manifest reality. Our souls are part of this domain. People choose divination when they can not find answers and explanations from the sources available in the linear, visible domain of their daily life.

Q: WHAT IS THE PURPOSE OF LIFE?

A: Perhaps, it is an ultimate goal of our current immortal, evolving soul incarnation during one's life. The soul is here, on the earth plane to get experience through meaningful, satisfying activity of every day life. It can be read in the birth chart and through the fingerprint analysis. Indians call it Dharma. For different people it may mean the different things: career, family, relationships with people, and so on, just name it.

Q: HOW WILL I KNOW MY PURPOSE IN LIFE?

A: Some lucky people find it through their personal experience, some from interaction with wise or enlightened teachers, some through psychologists, some find it through meditation or the art of divination, some through scientific finger prints analysis.

Q: WHAT ARE TAROT CARDS ABOUT?

A: Tarot cards are symbolic images and a map of collective and individual consciousness. C. Jung stated “the images are psychological mechanism for transforming energy”. It awakens a person’s intuition, allows them to see the issue from different point of view and helps them make decisions accordingly.

Q: Why would blending together divination arts like Taro card reading and Vedic Astrology work?

A: Approach based on understanding and acceptance of interrelation and interaction of everything in human life. William Blake wrote:

“To see a world in a grain of sand
And a heaven in a wild flower,
Hold infinity in the palm of your hand
And eternity in an hour...”

In other words, message can be read from different sources, however, the result will be the same.
